TALKS

Monique Chicourrat and Alain Escassut

Survey on topologies on the multiplicative spectrum of an ultrametric

Banach algebra

Alain Escassut

Growth of p-adic entire functions and applications

Helge Goeckner

Invariant manifolds for non-archimedean dynamical systems

Jerzy Kąkol, Wiesław Śliwa

Metrisable subspaces and quotients of non-Archimedean spaces

$C_p(X, K)$

Albert Kubzdela

Renorming Problem for non-archimedean normed spaces

John Rodriguez-Vega

Explicit Sums for an Imaginary Quadratic Field

Khodr Shamseddine

On the complex Levi-Civita field: algebraic and topological structures, and foundations for analysis

Menachem Shlossberg and Michael Megrelishvili

Non-Archimedean Transportation Problems And Kantorovich

Ultra-Norms

Agnieszka Ziemkowska-Siwiek, Wiesław Śliwa

Commutators on generalized power series spaces over non-archimedean fields
